OEM Hardware Solutions

**Exacta is very proud to be a fully accredited Intel Premier Provider, one of only 20 in the UK.**

As a Premier Member our close relationship with Intel allows access to the latest technologies and support. We always have priority service and access to replacement parts, backed by industry-leading warranties.

This also gives us the added benefit of having the choice of which components, right down to the individual main-boards, are used to create exactly the right combination for each of the individual solutions.

We use boxed Intel products that have been stress tested. We do not compromise on quality and only use recommended products to help ensure the highest reliability. Complete and timely availability of components empowers us to provide great accuracy in our delivery times.

Premier Members are technology experts and technical advisors. We are first in line to receive training on the latest Intel® Core™ microarchitecture solutions, so we can put the very latest technology to work to solve your challenges and help you reach your goals.

Our service and personal, on-site consulting are always close by when you need it.

At Exacta we have made it our business to build; supply; and support mission critical network servers; PCs and laptops that businesses like yours can rely on. We provide comprehensive IT solutions that match your system specifications and commercial requirements to the letter. In addition to delivering the very latest technology, manufactured to the highest standard, we also provide an unrivalled level of after sales support. This however is just a part of the unique package of IT solutions and services

Stay one step ahead . . .

Only Exacta specialises in building Intel based computing solutions for the OEM and reseller markets. We design; build; configure; test; brand; package; document and ship our products on your behalf - whether it is an internet security appliance, cash register, ticket dispenser, file server, pc or notebook, "WE MAKE IT YOUR OWN!"

Your own configuration. . .

Only Exacta has the in-house facilities and technical expertise to custom build and configure an Intel based solution to solve your problem. We work closely with Intel therefore can always offer the latest technology. We will work hand in hand with you throughout all phases of the design process to ensure our product fits your requirements exactly. During the production stage we will load and configure your software as per your specification. It is like having your own "VIRTUAL FACTORY!"

  
**exacta**  
make it your own™

Your own branding . . .

Only Exacta has the in-house facilities to customize cases, monitors and keyboards with YOUR company logos and or brands. We will work closely with you through all phases of the design to ensure the branding meets your requirements exactly.

Your own packaging. . .

Only Exacta has the capability to produce delivery notes as if they are from you. The great advantage is, when it comes to shipping direct to site; it appears to have been delivered straight from you not us! Delivery is usually within 3-5 working days from receipt of purchase order.

Your own delivery . . .

Only Exacta can incorporate the customers delivery note into the package. This means that your customer will receive a delivery note from you and not us! This is a great advantage when it comes to shipping directly to site - looking like it came directly from your premises.

We can deliver directly to the customers site usually within 3-5 days of us receiving the order.

# Intel, Exacta and **BLOXX** NO NONSENSE.

The Internet is obviously an essential tool but it also poses potential threats to security; coupled with the legal implications of accessing inappropriate content the Internet fast becomes a double edged sword.

Bloxx has developed web filtering technology which protects users across all sectors, from colleges and hospitals to large corporations. In education especially, it is essential to prohibit children viewing nasty material.

The growth in Bloxx's industry highlights the increasing awareness by organisations of the need for effective web filtering to ensure legal compliance and optimal productivity rates.

Bloxx needed a solution provider who could not only build, brand and ship to the end user but who could also provide support and service for the solution.

*'We chose Exacta because no one could match their product performance quality, customer service and in-house branding capabilities. Exacta's close relationship with Intel is very important to us as it means that we know we will always be using the latest technology available.'*

*Paul Irvine*
